And of course, Aggie Habitat appreciates your shack fixed payment and donations. The money raised by Shack-a-Thon goes directly to sponsor a Habitat home to be built by Aggie Habitat in the Bryan/College Station.

The money raised by Shack-a-Thon contributes to the \$60,000 it takes to sponsor a Habitat home here in the Bryan/College Station area. In 2019, we raised about \$15,000 through this event alone and could not have done that without your help. Thank you for participating in this event and hope you have an amazing experience at Shack-a-Thon this year!

Design, Construction, and Safety Guidelines

Aggie Habitat for Humanity's Shack-a-Thon 2020

Design

- All shack designs must be submitted to Aggie Habitat on or before **Monday, March 16, 2020** by 4 p.m. so the university can approve them prior to construction.
- All submitted designs must be dimensioned and drawn to scale, and must include at least:
 - 1.) Floor Plan: showing roof overhangs in dotted lines
 - 2.) Dimensions and placement of doors and windows etc.
 - 3.) Elevations: Front and Side view.
- The footprint of a single shack may not exceed 10'-0" x 12'-0", and the roof overhang must not exceed 12'-0" x 14'-0 (maximum footprint of 12x20 with total overhang no more than 14x22 for double shacks).
- All roof overhangs must be at least 7' from the ground. No part of the shack may exceed one level or 12'-0" in height. **Roof systems made with tarps must be properly supported in the event of a rain storm. Roof systems should be designed as to not allow significant ponding of water.**
- If the back and other side(s) differ significantly from the other drawings, please include drawings depicting them.
- Details: Must demonstrate that the roof/ceiling members bear on an appropriate supporting system. These drawings must also indicate that the shack has appropriate lateral bracing. Please include detail drawings as necessary.
- Raised floor systems (such as palettes) will be allowed but must be covered sufficiently with plywood or other rigid material to prevent people from stepping through gaps. This is recommended in case it rains so that your floors are not wet for an extended period of time. The student group must receive approval of the floor system by the Construction Coordinator or a designated representative during construction *before* the floor system is covered. Please note that a raised floor system must be properly supported. Such a floor system should be included in the design drawings. The maximum allowable height for an elevated floor is 36".
- **No painting of any kind will be allowed on University Property.** Groups are encouraged to pre-fabricate and paint their shack on their property before the official construction time begins for Shack-a-Thon. **A fine of \$50 will be charged for the possession of paint on the premises. A \$200 fine will be processed if paint is used in the village.**

- Construction materials may NOT include:
 - Sheet metal
 - Glass of any kind
 - Rotted wood
 - Hazardous materials (if you think it is hazardous, it probably is)
 - Cardboard may not be used as a structural material to carry a roof or any element above 4 feet
 - *Aggie Habitat reserves the right to take down any material that is deemed unsafe. If a structural system is deemed unsafe, Aggie Habitat will offer suggestions to rectify the problem. If the problem is not fixed after one warning, the Shack will be dismantled.*

Construction

1. All construction must take place at the Shack Village at Kyle Field between 8 a.m. and 5 p.m. on Monday, **March 30th**.
2. Construction will take place in front of Kyle Field off Joe Routt Boulevard and Houston Street. Each student group will be assigned a limited time slot in which up to two vehicles will be allowed to access. Vehicles will be allowed to go the designated area and unload.
3. Each student group will be assigned one construction supervisor from Aggie Habitat during the construction phase. This person will act as the Designated Representative for the Construction Coordinator. This person will have authority over the construction of the individual shack. These persons will be assigned to the groups as they begin construction.
4. The use of power tools is restricted to **drills or screw guns only** (provided by your student group). Otherwise, no power tools of any kind will be allowed on school premises. *Construction is the **ONLY** time that extension cords will be allowed at Shack-a-Thon. Any cutting of materials using electric saws must be done before the materials have reached campus- **No Exceptions**. Handsaws, hammers, and other manual tools will be allowed.
5. Each student present **inside** the construction area must have already signed an Assumption of Risk/Release of Liability waiver and be wearing a Shack-a-Thon armband (completed at check-in at Aggie Habitat table).
6. Safety goggles, long pants, and close-toed shoes must be worn by ALL participants inside the construction area at all times. Student groups will be able to check out safety goggles from Aggie Habitat (limit: 10). A \$5 fine will be incurred per pair of goggles not returned. Participants completing **overhead construction** (roofs) **MUST** be wearing hardhats. Aggie Habitat will check out up to 4 hardhats per group. Even if a group provides its own hardhats, a maximum number of 4 students can participate in overhead construction. A \$10 fine will be incurred per hardhat not returned.

During the Event

1. Due to health and safety regulations, the use of extension cords other than for power tools during construction has been **prohibited**. Each shack should be near a power source with outlets. No extension cords, surge protectors, splitters, etc. should be plugged into the power source. Double shacks will receive two power boxes for a total of 8 outlets.
2. Good housekeeping should be practiced throughout the duration of the event. Clothing, bedding, backpacks, etc. should be kept neatly out of the way of traffic. The power box should be kept clear – not buried under empty pizza boxes. TAMU Environmental Health and Safety department will be making daily walkthroughs of the Shack Village – don't make them angry!
3. Because of our location and the proximity of classrooms and offices, amplified sound is not allowed until after 6 p.m. each day.

Tear Down/Clean-Up

1. The tearing down of shacks will be permitted on **Thursday, April 2nd** between 7:30 a.m.-12p.m.
2. All tear down must be done with the safety of everyone involved, including the adjacent shacks.
3. Two dumpsters will be provided during tear down by Aggie Habitat.
4. **Entire walls or large sections of walls are not allowed in dumpster. They must be broken down first to allow for adequate room in dumpster. \$200 fine will be charged if care is not shown in disposal of shacks.**
5. Each organization must provide and use their own broom and dustpan to clean up their lot after the materials have been removed.
6. All materials must be removed from University Property by each student group by 12 p.m. on **Thursday, April 2nd**. **Any student group leaving materials on University property will be charged a \$50 fee plus \$300 for every hour of clean-up done by Aggie Habitat for Humanity.**
7. Vehicles (up to two) can be utilized similarly to unload/construction. More details to come.
8. Groups are encouraged to recycle or sell their materials. They may donate their shack to Habitat for Humanity, for future use. If this is to be done, all nails must be removed from the materials before donation.

Have a blast! A lot of safety concerns simply rely on common sense ☺

I have carefully considered my decision; the benefits and risks involved and hereby give my informed consent to participate in all volunteer Activities. I have read and understand this Release and Waiver of Liability, any questions of mine have been answered, and I voluntarily agree to the above provisions.
